

UltraGI Replenish Vanilla

Support for the Management of Compromised Gut Function with Digestive Disorders including Malabsorption

Form: Powder

Flavor: Vanilla

Size: 30 Servings

UltraGI Replenish® is a medical food formulated to provide specialized macro-and micronutrient support for patients challenged by compromised gut function with digestive disorders including malabsorption. It is designed to complement an eating plan that excludes common food allergens and supports healthy gut function.

- Formulated with prebiotic isomalto-oligosaccharides (IMOs) and nature-identical human milk oligosaccharides (HMOs, as PreBiome 2'-FL™)
 - IMOs encourage production of short-chain fatty acids to address mucosal and intestinal issues
 - Nature-identical HMOs as 2'-fucosyllactose (PreBiome 2'-FL™) selectively nourish beneficial bacteria to promote intestinal microbial balance
- Sustamine® is an advanced alanine-glutamine dipeptide designed for enhanced absorption, stability, and solubility
 - L-glutamine is a valuable energy source for intestinal mucosal cells
- Contains a total of 15 g protein per serving—12 g of pea/rice protein blend and 3 g of added amino acids and Sustamine®
- Provides essential nutrients to address malabsorption, including:
 - Methylated vitamin B₁₂ and calcium L-5-methyltetrahydrofolate, a bioavailable folate
 - Antioxidant nutrients (e.g., vitamins C and E) to combat free radicals, including those that contribute to mucosal oxidative stress
 - Zinc as zinc gluconate to support gastrointestinal mucosa integrity
