

SpectraZyme® Gluten Digest

Targeted Support for Enzymatic Breakdown of Gluten*

Form: Capsules

Flavor: no flavor

Size: 90 CAPSULES

SpectraZyme® Gluten Digest, featuring Tolerase® G, is a targeted protease enzyme supplement that has been clinically shown to help digest gluten in humans as well as in gastrointestinal and in vitro models. This formula helps promote the breakdown of gluten proteins in the stomach which may help support healthy digestion of wheat, barley, rye, and other sources. Human studies also indicate that Spectrazyme® may help break down gluten proteins before they reach the small intestine, a key consideration in healthy digestion.*
