

ZENITH[™] by AWAKEND.

ZENITH is a clinically-proven, patented formula that may accelerate fat loss by working through the body's Leptin System.* This product gently decreases Leptin levels to restore accurate communication between fat cells and the brain, allowing your brain to hear the "stop eating and burn fat" messages.*

BENEFITS

- May Increase Healthy Fat Loss*
- May Reduce Serum Leptin*
- May Increase Serum Adiponectin*

HACK YOUR HORMONES

It's all about understanding our biology and the crucial role of two powerful hormones — leptin and adiponectin.

Leptin is a signaling hormone that helps regulate appetite by telling your brain to either "keep eating and store fat" or "stop eating and burn fat." Too much leptin signals the brain to "keep eating and store fat." At this point, your brain ignores all other weight loss messages.

Adiponectin is a hormone known for regulating glucose levels and insulin sensitivity. Lower-than-normal adiponectin levels are associated with obesity.

HOW TO USE

Take three (3) capsules twice a day, 30 minutes before your two largest meals, with at least eight (8) ounces of water.

KEY INGREDIENTS

Zenith's Clinically-Proven Proprietary Complex

CLINICAL STUDY

In an 8-week, university-conducted, double-blind, placebo-controlled study, participants on ZENITH*:

- Lost 20.3 lbs of weight*
- Lost 21.4 lbs of fat*
- Lost 3.9 inches off their waist*
- Lost 2.9 inches off their hips*
- Lost 1.2 inches off their thighs*
- Maintained all muscle mass*
- Reduced serum leptin by 43%*
- Increased serum adiponectin by 116%*

VISCOUS POLYSACCHARIDES

Viscous polysaccharides work in a number of ways to support healthy weight management. First, they gel and expand in the stomach. This helps begin the signals that tell your brain you are full so you are likely to eat less at your next meal. Second, this gelling and expanding activity also helps bind food making it less immediately bioavailable so calories are absorbed more slowly.

CETYLATED FATTY ACID

Cetylated fatty acids are a group of naturally occurring fats from plants and/or animals. They include cetyl myristoleate, cetyl myristate, cetyl palmitoleate, cetyl laureate, cetyl palmitate, and cetyl oleate.

SUPPLEMENT FACTS

Store in a cool, dry place.

Consult a healthcare practitioner if you are pregnant or nursing.
