

Vitamin C Products

Vitamin C is one of the most important water-soluble antioxidant nutrients and is involved in a wide variety of biochemical reactions throughout the body. Humans, unlike most other mammals, cannot manufacture vitamin C, so we must rely on food or nutritional supplements. Vitamin C is stored in tissues throughout the body, and is especially concentrated in the adrenal glands, where it is crucial for the production of adrenal hormones involved in responding to stress.* The body uses vitamin C in immune system functions including white blood cell production, histamine release and degradation, the reduction of glutathione, and the metabolism and protection of several other nutrients.* Vitamin C is involved in detoxifying heavy metals such as lead, cadmium, mercury and nickel.* It is involved in the production of collagen and elastin, important connective tissue proteins.* Vitamin C may also support HDL cholesterol within normal levels, and bone mineral density.*

Allergy Research Group® has pioneered the development of buffered vitamin C products, and continues to offer the purest and least allergenic vitamin C products available. In addition to its hefty content of ascorbic acid, our buffered vitamin C also supplies the macro-minerals calcium and magnesium at approximately one half the RDI per heaping teaspoon, which may make it desirable for individuals who do not regularly consume dairy products.*

Item #70010
120 vegetarian capsules

Buffered Vitamin C

Supplement Facts	
Serving Size	2 Capsules
Servings Per Container	60
Amount Per Serving	% Daily Value*
Vitamin C (as Ascorbic Acid)	1 g 1111%
Calcium (as Calcium Carbonate)	190 mg 15%
Magnesium (as Magnesium Carbonate)	104 mg 25%
*Percent Daily Value are based on a 2,000 calorie diet.	

Other ingredients: Hydroxypropyl methylcellulose, silicon dioxide, microcrystalline cellulose, stearic acid, magnesium stearate.

Buffered Vitamin C Powder is formulated with carbonates of calcium, magnesium, and potassium, giving an acid-alkaline buffering action (pH 7.0 in water), potentially improving bowel tolerance and minimizing hyperacidity.*

Allergy Research Group® Buffered Vitamin C has been used clinically for offsetting acute hypersensitivity reactions and the addictive craving for foods, cigarettes and other withdrawal states from stimulants and alcohol.* A study at the Haight-Ashbury Free Clinic in San Francisco demonstrated that Buffered Vitamin C could offset and reduce withdrawal symptoms for stimulants and opiates by 90% in outpatients, who took a teaspoon of Buffered Vitamin C whenever they felt a craving.*

Our newest vitamin C product is Buffered Cassava Vitamin C capsules, providing high-purity non-GMO ascorbic acid from cassava root, buffered with carbonates of calcium and magnesium. Polyphenol-C® 500 offers pure non-GMO vitamin C with concentrated polyphenols from grapes, blueberries, cranberries, blackberries, raspberries, and strawberries. Micro Liposomal C utilizes non-GMO vitamin C, in pure essential phospholipids from non-GMO sunflower lecithin. The soy-free liposomes are several times smaller than other vitamin C liposome products. Micro Liposomal C pours freely as a liquid and tastes great.

Item #76770
120 mL (4 fl. oz.)

Micro Liposomal C

Supplement Facts	
Serving Size	1 Teaspoon (5 mL)
Servings Per Container	24
Amount Per Serving	% Daily Value
