

MycoRev Derma

MycoRev Derma is a professional grade skin supplement containing Tremella mushroom (*Tremella fuciformis*) and olive fruit (*Olea europaea L.*) extracts.

True beauty starts from within. MycoRev Derma is an oral supplement to help nourish and improve the skin from the inside out. This powerful combination of *Tremella fuciformis* and Opextan® (*Olea europaea L.* pulp) makes MycoRev Derma the perfect addition to any daily skincare regimen.

Active Ingredients:

- ▶ **Tremella 8:1 organic fruitbody extract** is a highly concentrated ingredient derived from *Tremella fuciformis*, a mushroom that has been used in traditional Chinese medicine for its youthful, beauty-enhancing benefits, and it is packed-full of potent antioxidants. The polysaccharides in Tremella can help maintain skin integrity as well as protect and regenerate the skin. Tremella mimics the effects of hyaluronic acid, drawing moisture to the skin and keeping it hydrated, resulting in increased elasticity, tone, smoother texture, and a more youthful appearance. 3rd Planet's Tremella extract is 8 times more potent than whole Tremella and is scientifically proven to boost overall skin health.
- ▶ **Opextan® 12.5:1 olive fruit extract from *Olea europaea L.*** is obtained from the edible part of the plant, the fruit (not leaves or wastewater), and is standardized to deliver powerful polyphenols like hydroxytyrosol, tyrosol, isoacteoside, and verbascoside, known to have the greatest antioxidant activity of any compound from the olive tree. The free radical-scavenging activity of olive polyphenols may have a direct impact on skin health, including prevention of oxidative effects related to wrinkle formation, skin-thinning, and dehydration. Taken orally, Opextan has been demonstrated in human clinical trials to help promote dermal UV and skin protection and reduce the loss in microcirculation observed in aging skin. MycoRev Derma uses the same dose as these clinical trials.

MycoRev Derma

Benefits:

- ▶ **Hydrates skin from within.** The polysaccharides in *Tremella fuciformis* are shown to attract and retain up to 500 times its weight in water, which can help increase the skin's hydration levels. Tremella penetrates skin to enhance its natural moisture levels deep from within. This hydration boost can help make skin moisturized and supple.
- ▶ **Improves skin texture.** Tremella mushrooms are rich in plant collagen, which can also help enhance the skin's natural collagen production. The polysaccharides in Tremella promote skin collagen synthesis, which helps boost skin elasticity and reduces the appearance of fine lines and wrinkles.
- ▶ **Helps prevent oxidative stress.** *Tremella fuciformis* is naturally abundant in polysaccharides, which have been shown to have anti-aging and antioxidant properties. Antioxidants protect the skin from free radical damage that can cause premature aging. Tremella mushrooms can be used to maintain healthy cell regeneration and promote a vibrant, youthful glow.

Incorporating Tremella mushrooms into any skincare regimen has never been easier with MycoRev Derma. No messy creams, serums, or gels.

Supplement Facts		
Serving size: 1 Capsule	Servings per container: 60	
Amount per serving	% Daily value	
Tremella 8:1 organic fruitbody extract from <i>Tremella fuciformis</i> 2g	250 mg	**
